

Lecture 3

Ethics in AI

- open ai runs chat gpt on their service not your phone
- everything you do on the internet has a carbon footprint
- ai doesn't cost anything directly to use but the internet it uses is significantly more so that costs more
- ai companies use youtube transcripts to train ai and they are getting sued for it
- the data centers are using so much water that the nearby people have little to no well water in their own houses
- ai companies also use books to train ai and there a few copyright laws for books so they get away with it more
- now data on the internet is using ai and it will usually have hollusions and false news
- ai companies dont use ai data to train ai but it's getting harder to tell the difference between ai data and human made data
- beginning twitter ai was cropping light skinned people correctly but cropping darker skinned people was way less accurate
- ai sicosis is ai just giving in to peoples beliefs because it doesn't know otherwise
-
